Product innovations

Nano Care

Made in Germany with 5 years warranty, our anti-lime treatment brings a long-term transparency to the KRONE shower enclosure. If normal use, the water and lime stains won't remain on the glass surface : a minimal scraper use is enough, most of the residues disappear without any effort. The daily maintenance is fast, easy and ecological.

The superhydrophobic coating provides a robust defence against the build-up of limescale and soap scum
Nano-Care treatment does NOT include PFAO.

Super White

We transform the Premium glasses in our workshops with our own glass machines, with special care and permanent controls. The back panels KRONE are equipped with PURE WHITE technology, which offers an extra white color with long-lasting brightness.

Composable

With the adjustable products from KRONE brand, you have a total freedom to choose and personalize your products. You will find the expected combinations, as so many different versions exist.
